Past to present

We at Hardwood Flooring Imports have built our reputation based on supplying the finest quality hardwood flooring. Supplying our customers with a superior product offering and excellent service is the foundation of our beliefs, having experimented with various types and styles of wood in order to bring you the finest offerings in hardwood flooring. This attitude is also one shared by Atkinson & Kirby, making for a harmonious match when the two companies joined in 2007, becoming one of the UK's largest manufacturers and distributors of hardwood flooring.

As a leader in hardwood flooring we are committed to finding new, innovative concepts and designs whilst providing the authentic flooring our customers are accustomed to. Atkinson & Kirby were established in 1908, allowing us access to their many years manufacturing experience and in turn giving you the opportunity to create and customise your own hardwood floor.

Having supplied flooring for a variety of residential, retail, commercial and hospitality projects over the years, Hardwood Flooring Imports are part of one of the oldest, most established company in the UK hardwood flooring market. With such a wealth of knowledge and expertise at our finger tips we can ensure our products are sourced from carefully selected suppliers, maintaining a consistently high standard of quality.

Hardwood flooring is an investment worth making, the strong, durable and undeniable quality of a hardwood floor is plain for all to see. With a wide variety of species and finishes available, constant innovation and excellent customer service levels, Hardwood Flooring Imports are one of the leading names in the UK Hardwood flooring market.

A heritage to be proud of...

Hardwood Flooring Imports take great pride in the quality of their wood with rigorous inspection at various stages of production. Today we are just as meticulous in our selection, whilst making sure the origin of our wood is from a sustainable source and are proud to be both FSC and PEFC certified.

Manufacturing Excellence

We have a team of skilled craftsmen with many years experience, some of which have been with the company for over 25 years. This allows us to provide you with the finest products, tailored to bespoke sizes and formats where necessary. Our colour matching facilities also enable us to closely match existing timber colours.

Our hardwood flooring has been supplied for a variety of bespoke projects including the Eurostar Terminal at St Pancras, Liverpool Town Hall and the National Museum of Scotland.

5Gc Clic

A flooring installation with the 5Gc locking system is faster and easier. The flexible tongue allows for a “single action” method of installation, with the click sound acting as confirmation of correct installation.

Platinum Range, Cherry

Our Platinum Range offers you a variety of timbers, from traditional White Oak to the tropical Jatoba making for an extensive cosmopolitan collection. This collection is also enhanced through the additional benefits of the 5Gc Clic system, ensuring boards simply glide together, making for an easier and quicker installation.

With a hardwood core the Platinum Range offers you the ultimate in contemporary style, quality and seamless comfort.

Our Concept II Elite offers the same high quality flooring as our Concept II Range with a more tactile, textured, brushed finish. The brushing creates a more subtle appearance whilst retaining the bold, dramatic colours which form this eclectic collection.

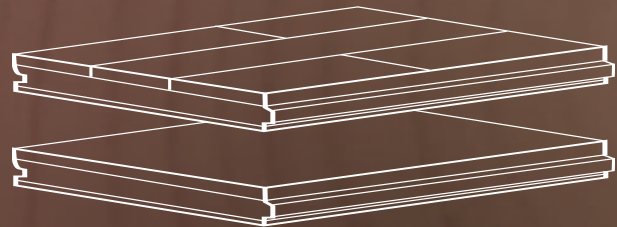

Technical guide

Solid Boards – A solid board is as it says, a board made entirely of one piece of solid wood.

Multi-Layer/Engineered Boards – They consist of a hardwood veneer with either a hardwood or poplar core, and a softwood base. A multi-layer can also be a hardwood veneer with several layers of plywood as the base.

Plank refers to a multi-layer board with one hardwood veneer across the full width of the board, whereas **3-strip** comprises of random length veneer staves, laid 3 wide on the base of the boards.

Caledonian Range

Description: Solid and Engineered strip available in a variety of species. Engineered boards available with a 3mm, 4mm, or 5mm wear layer, depending on width.

Width: 189mm or 220mm (only with 22mm thickness)

Length: 1830mm or 1860mm

Further information

Colour, Hardness and Species

Each individual species of wood has its own characteristics, appearance* and durability. The Janka Hardness Scale measures the durability of wood based on denting and withstanding wear. When choosing a hardwood floor, the purpose should be taken into account when looking at which species to use.

The colour of wood can also develop over time in reaction to sunlight exposure, with darker woods gaining in richness of colour and others may lighten. The stain and finish of your flooring may also vary in different lights so HFI are happy to send samples for you to take away and consider.

Maintenance

Hardwood floors can be easily maintained and kept in good condition ageing with style and constantly developing in character. If your hardwood floor is neglected or worn, renovations can easily be carried out. Here are some top tips to get the most out of your hardwood floor:

- Do not lay hardwood flooring in wet areas such as shower rooms or bathrooms.
- Sweep or dust/dry mop regularly to remove dirt and grit using soft fabrics and when vacuuming use a felt or soft brush-head attachment.
- Avoid heavy mopping, too much water can

Hardness Scale

Lapacho	3680	<p>Rated as according to Janka Hardness Scale</p>
Jatoba	2350	
Hickory	1820	
Kempas	1710	
Wenge	1630	
Hard Maple	1450	
White Oak	1360	
Beech	1300	
Birch	1260	
Iroko	1260	
Larch	1200	
Walnut	1010	
Cherry	950	

damage the floor.

- Any spillages should be cleaned up immediately.
- Barrier matting should be provided at all external doorways.
- Pet claws, sharp objects, stiletto heels etc can all damage hardwood floors.
- Protective pads should be used under all furniture legs.
- Check doorways and heavy traffic areas for signs of heavy wear. This is indicated by a dulling of the surface and a grey appearance. At this stage it is necessary to apply a maintenance coat of seal.

*Samples are only a representation and cannot be used as an exact indication of colour/grade.

Mission Statement

Hardwood Flooring Imports are committed to providing our customers with...

Quality, durable, hardwood flooring

To suit all specifications

Product selector

* We do not recommend solid flooring over 150mm wide be glued down to a subfloor. Solid flooring wider than 150mm should be secret nailed to a suitable subfloor, and therefore concrete and other solid subfloors will need to be sheeted out with plywood beforehand.
