JARGON BUSTER

CG
FINISH

CLOSED GRAIN

Our closed grain doors have a very smooth finish and have a UV coat of lacquer. This glossy look works particularly well in modern interiors.

OG
FINISH

OPEN GRAIN

Open grain doors are varnished but still maintain a very natural look and feel.

UF
UNFINISHED

UNFINISHED

An unfinished door prepared ready for your choice of varnish.

PF
PREFINISHED

PREFINISHED

Prefinished doors are ready to hang and are factory finished.

P
FINISH

PRIMED

A primed finish is where a door has been prepared with an undercoat ready for a top coat finish of your choice.

FD30

FD30

An FD30 fire door is rated to give 30 minutes of fire protection.

ACOUSTIC

Acoustically tested to 31dB complying with Part E of the Building Regulations.

THE DÉANTA STORY

We are not just another door company. We are not like everybody else. We have worked within the door industry for more than 20 years. During this time we have established ourselves as a forward-thinking, innovative company with a mission to revolutionise the door industry. At Déanta, we have a strong set of beliefs that run through everything we do.

OUR COMMITMENT TO QUALITY

Customer satisfaction is Déanta's highest priority. We achieve this goal by continuously improving the cost effectiveness and performance of all our products and processes, as well as focusing on innovation.

Unlike other UK door companies, we have our own manufacturing facility. This not only allows us to control stock supply, but it also allows us to have full control of the quality control process to ensure every door that leaves our factory is of the very highest standard.

This enables us to be extremely competitive on price, as well as surpassing expectations on service and giving us the flexibility to have doors manufactured to meet your exact specification.

OUR COMMITMENT TO THE ENVIRONMENT

We only use FSC® certified materials in all our prefinished doors, meaning they are sourced from well-managed FSC® certified forests and from recycled materials.

The FSC® ensure that forests are kept alive for generations to come. Harvest of all their timber products maintains forests' biodiversity, productivity and ecological processes.

Although many timber suppliers suggest their materials are from 'sustainable' or 'managed' sources, without an independent certification system, there is no way of verifying this or demonstrating the expectation levels to our clients. FSC® set higher standards than any other forest certification system, giving the best assurance that forests are being managed responsibly and giving us peace of mind that we know exactly where our materials have been sourced.

18mm solid oak lippings on all edges

Solid oak inlays

High density PB core

Shaker oak architrave

Shaker oak skirting

THE DÉANTA COLLECTION

At Déanta we manufacture and supply a wide range of beautifully crafted stylish interior doors. Our collection includes oak, walnut, dark grey ash, light grey ash, abachi and white primed doors along with a selection of FD30 fire doors.

We also manufacture a range of skirting, architrave and door lining sets in oak, walnut and white primed. These sets use the same hand-picked veneers as our doors, complementing them perfectly.

All Déanta doors are made to the highest standard with only the finest of materials ensuring you get the best from your contemporary Déanta door. Our design team tirelessly follow the door industry to come up with new, exciting designs to add to our ever-increasing collection. And our rigorous testing procedures ensure that only the very best doors make it to market.

Déanta offers the largest lippings available in the UK internal door market. All of our doors have 18mm lippings around the entire door meaning that a total of 32mm can be taken off the height and width of all our standard doors ensuring they will fit into any size opening. *

We only ever produce solid core doors that are heavy and robust and are finished with specially selected crown cut oak, walnut, dark grey ash, light grey ash and abachi veneers to give a real timber look and feel. Our white primed doors are produced in the same way as our veneered doors and are ready for a one-coat finish.

All of our prefinished doors are FSC® certified.

Look for FSC® certified products.

* Please contact us for advice on FD30 lippings.

BESPOKE DOORS

dēanta
BESPOKE

YOUR DOOR. YOUR SIZE. YOUR STYLE. OUR PLEASURE.

Choose a bespoke size of any door in this brochure or even design your perfect door and our skilled craftsmen will bring your ideas to life.

Simply follow our four steps to get your perfect door.

Please visit our website at: www.deantabespoke.co.uk for more information.

STEP 1

Contact your local stockist with your request

STEP 2

Once we receive your enquiry you will be sent a quotation and lead time

STEP 3

You will receive a technical drawing and once approved, your door will go into production and lead time given.

STEP 4

Your bespoke doors are delivered direct to your home.

FOLDING SYSTEMS

Configuration: 2 + 0 | Featured door: **Montreal dark grey ash glazed**, page 102 | Skirting & Architrave: **Shaker, white primed**

FOLDING DOOR SYSTEMS

déanta
FOLDING SYSTEMS

A brand new stylish room divider solution which uses a high quality track to allow any of our doors to effortlessly glide across the system. Room dividers offer a vast array of different options to choose from. A room divider can bring that flexibility to a property that is not always afforded by merely using walls to separate rooms. Numerous configurations can be created to suit any home.

A complete off-the-shelf solution allowing you to quickly and easily install your chosen configuration. We have specially designed the track and bearings and put them through rigorous testing to ensure they can withstand the extra weight you would come to expect from a Déanta door. This ensures that your doors will effortlessly slide every single time, and will last for years to come.

For more information visit our website at: www.deanta.co.uk

Configuration: 3 + 0 | Featured door: **Coventry white primed glazed**, page 080 | Skirting & Architrave: **Ulysses, white primed**

CHOOSING YOUR SYSTEM

SELECT OPENING WIDTH AND CONFIGURATION

OPENING WIDTH		CONFIGURATIONS		
610MM	686MM			
1295MM	1447MM		2 + 0	
1908MM	2136MM		3 + 0	
1908MM	2136MM		2 + 1	
2521MM	2825MM		4 + 0	
2521MM	2825MM		3 + 1	

Please allow 10mm on outer frame width for recommended structural opening width.
Outer frame height can be adjusted between 2050mm and 2060mm dependent on flooring detail.
Linings are supplied oversize to allow them to be cut to suit.

CHOOSE YOUR DOOR

Fold offers you the freedom to choose any door from the Déanta range to achieve the look you want. The doors above are the most popular choices for the system. We supply door linings in oak, walnut and primed to match any door you choose for your folding system.

SLIDING SYSTEMS

SLIDING DOOR SYSTEMS

déanta
— SLIDING SYSTEMS —

Our pocket door system is the perfect solution where there is not much space available, such as kitchens or bathrooms. Concealing internal sliding doors within the wall cavity has a significant impact on both usable space and perceived available space, making rooms more flexible and feeling lighter and airier.

Additionally, you can also get a double pocket door system using two pocket doors installed side by side. Designed to work in partition walls, each pocket door kit comes with a pre-assembled aluminium track and header mechanism.

Our pocket door kit is compatible with the majority of Déanta doors and includes all the hardware that you'll need, no surprises!

In particular, the door jambs included in our pack, will provide the finishing touch that you need in order to conceal the sliding system.

Furthermore, the under door profile provided allows a stable and smooth sliding.

Our pocket door system can be upgraded with add-ons such as a soft close, a self closing kit or a bathroom lock.

For more information visit our website at: www.deanta.co.uk

Featured door: Pamplona oak, page 048 | Skirting & Architrave: Shaker, white primed

FIRE RATED GLASS

As part of our commitment to being a one-stop shop for our customers’ door needs, we now offer our own patented fire rated glass.

The glass has been extensively tested and accredited by Exova and satisfies all the safety needs required so you can be confident that your home and family are protected.

We are also very proud to have teamed up with Lorient to offer a full range of fire, smoke and thermal seals for the ultimate in fire safety.

The following doors can be pre-fitted with fire glass.

ACOUSTIC

A number of our FD30 doors have been acoustically tested to 31dB. These doors comply with Part E of the Building Regulations when fitted with the appropriate seals including an automatic drop seal at the threshold.

We have partnered with Lorient to provide the very best in acoustic sealing systems. All these products are now available from stock.

DÉANTA ARCHITECTURAL

dēanta
ARCHITECTURAL

Our latest Architectural range offers our customers an extensive choice of internal doors, aperture options and glazing types providing maximum flexibility when creating their ideal door.

All customisations to our doors - aperture cutting and glass fitting - are completed in our very own specialist Joinery & Glazing Centre in Cambridgeshire. This service allows us to significantly cut down the lead time for glazing, ensuring that project deadlines are met and the product is delivered with the exceptional quality that our customers have come to expect from Déanta.

Think Different

THE DÉANTA DIFFERENCE

With an established reputation for commitment to innovative design, unsurpassed craftsmanship and excellent client service, Déanta is committed to standing out from the crowd in the door industry.

Unlike most door suppliers in the UK, we manufacture all of our doors in our very own manufacturing facility. This not only allows us to control stock supply but it also allows us to have full control of the quality control process to ensure every door that leaves our factory is of the very highest standard. We have rigorous quality control procedures in place to check every single door and we stand by this with a limited 10 Year Manufacturer Warranty on all of our doors.

Our team of highly skilled craftsmen, with the help of the latest state-of-the-art technology, achieve a perfect finish to an exceptionally high standard and lasting quality to every single door. Our team are able to offer bespoke doors to meet your exact requirements – in any size and any finish. For more information about our bespoke design service please refer to page 10.

We use only the finest, responsibly sourced timber. All of our prefinished products are FSC® certified. As we manufacture all of our doors, we can guarantee that every single door is a responsibly sourced product.

Above all else, what truly makes us stand out from the rest is our customer care. We truly care about the experience our customers have when they deal with us. We welcome feedback and continually strive to offer unsurpassed customer care. We are a company that offers solutions, not problems.

Déanta has over 20 years of experience in the building and design industry which we strongly feel is fundamental in building strong, sound working relationships with our clients who are mostly door merchants – and to their customers – designers, architects and builders. That's why they keep coming back to us.

We have sensor lighting throughout our site to ensure that no power is wasted when not in use.

We are certified by the Forest Stewardship Council® (FSC®)

98% of all our onsite waste is recycled.

We use mains water dispensers to reduce the use of plastic bottles and help the environment.

Solar panels on the roof of our building create enough energy to make our building self-sustainable for seven months.

BEING RESPONSIBLE

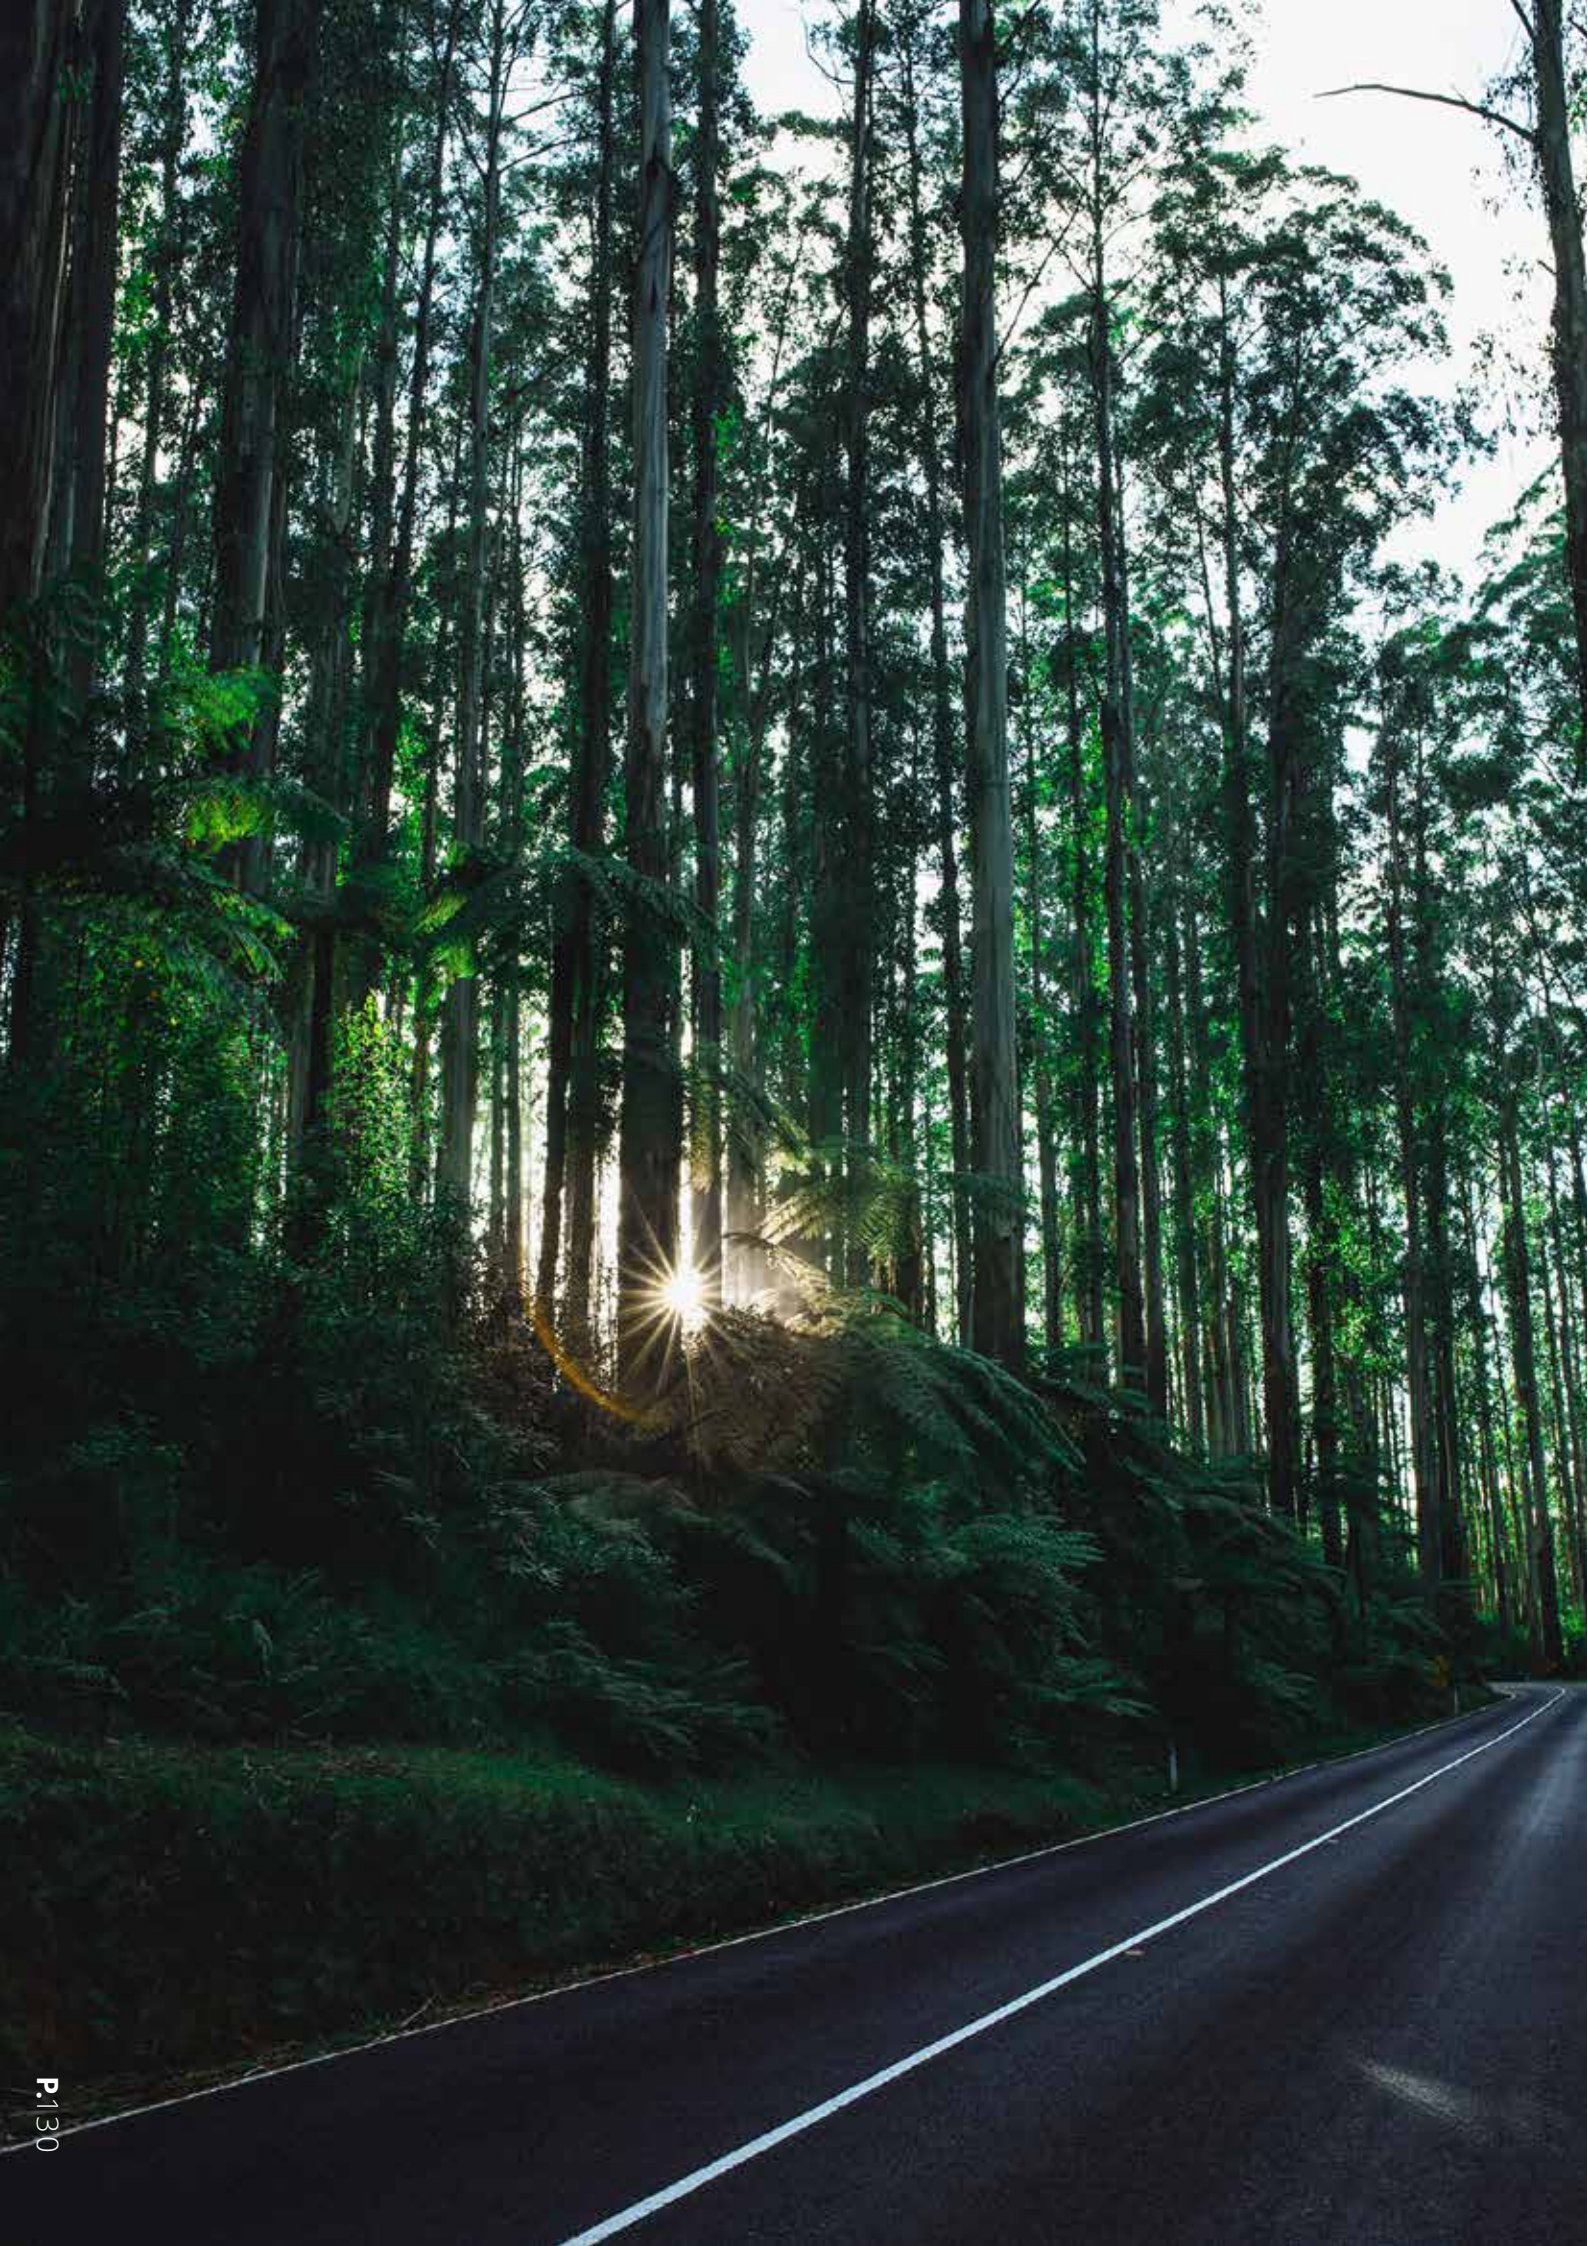

In an age where there is continued depletion of natural resources, companies throughout the world have shifted priorities to become more environmentally aware.

At Déanta, we have realised how our operations can impact the environment so we are investing heavily to become more environmentally responsible. Throughout the business we are working to reduce our carbon footprint, helping to protect our planet and ensuring we have a positive impact on our society, economy and environment. We are always looking at ways we can reduce, reuse and recycle the resources we use.

We apply environmentally friendly practises to both our offices and the supply chain:

- + 98% of all our onsite waste is recycled. We have recycling bins throughout the site including in our staff canteens, to make sure all Déanta employees are doing their bit for the planet.
- + We have installed solar panels on the roof of our building which creates enough energy to make our building self-sustainable for seven months.
- + All our timber is sourced from North American forests with sound environmental forest management schemes. These schemes ensure the forests biodiversity, productivity and ecological processes as well as protecting the rights of local people.
- + We are certified by the Forest Stewardship Council® (FSC®) and all of our prefinished doors are made from FSC® certified material, reducing our carbon footprint.
- + We have sensor lighting and taps throughout our site to help us ensure that no power or water is wasted.
- + We use mains water dispensers to reduce the use of plastic bottles and help the environment.

TERMS & CONDITIONS

We offer a limited ten year warranty on all our doors. Any Déanta door that warps* or splits will be covered by our warranty once the installation has met all guidelines. Please note colour variance in the wood is not considered a manufacturing fault as it is a natural product.

THE FOLLOWING MUST BE CARRIED OUT TO ENSURE THE BEST PERFORMANCE FROM YOUR DÉANTA DOOR

- All doors must be examined immediately on receipt and prior to installation as claims or faults will not be accepted once the door has been installed or altered. This excludes manufacturing faults that occur after hanging.
- All doors must be measured individually when having glass fitted. Déanta doors are hand-assembled, and as such, we cannot guarantee each aperture is the exact same size. We recommend you use a qualified glass fitter.
- Doors must be stored horizontally on a clean, dry, flat and level surface.
- Doors must not be fitted in a house that is freshly plastered and doors should only be delivered to site after all wet trades are finished and sufficiently dried. A moisture reading taken by an engineer must be recorded.
- For doors to acclimatise, they should be left in the house prior to installation for at least seven days with the ambient temperature gradually increased over this period.
- Should a door require alteration, cutting or planing, it must be immediately revarnished to prevent moisture absorption which may lead to warping or splitting.
- Take no more than 32mm (30mm for FD30) off the width and height of doors in equal amounts on all edges.
- Planed edges of prefinished doors must be refinished using three coats of internal wood finish.
- Three coats of internal wood finish are required on unfinished doors and on any modifications to a prefinished door including the ironmongery and hinge cut-outs.
- We recommend the use of three sets of hinges per door.
- We recommend varnish and lacquers that are suitable for interior joinery. If using oils please contact Déanta for recommended brands.

UNDER OUR WARRANTY, OUR LIABILITY IS LIMITED TO REPLACING THE DOOR AND NO LIABILTY IS ACCEPTED FOR ANY CONSEQUENTIAL COSTS. ALTERATION OF A DÉANTA DOOR WILL VOID THE WARRANTY.

* Warp/bow/cup/twist (as set out in the relevant British Standard) shall not be considered a defect unless it exceeds 1/4 inch (6.35mm) in the plane of the door itself. Warp is any distortion in the door itself and does not refer to the relationship of the door to the frame or jamb in which it is hung.

For more information on our warranty and for full terms and conditions please visit our website at: www.deanta.co.uk.
