The Aurora range of doors feature horizontal Ash strips with vertical grain and are primed for on site finishing. Doors are pre-glazed with 6.4mm clear laminated glass.

There is no easier or better way to transform the look of your house than by replacing your tired and out of date doors. This door range represents a contemporary take on the sophisticated clean lines of the great Art Deco period with the eternal beauty of real wood veneers.

COLOUR OPTIONS

COLOUR, INSIDE AND OUT

Rockdoors are available in 13 colours so you can choose what's right for you. Each colour features a delicate wood effect grain to make it look like a timber door. As Rockdoors are 'made to order', not 'cut to size', all colours are available inside and out. Please check our colour swatch before ordering or use our door visualizer at Rockdoor.com.

COLOURED DRIP BARS
Choose a colour matched Drip Bar to complement the colour of your door.

Available with matching outer frame.

Light Oak
Available with matching outer frame.

UNIQUE TO ROCKDOOR

The way a Rockdoor is designed and manufactured differs greatly from timber or GRP foam slabs that are widely available in the market. It's what makes us stand out from the crowd.

STEEL SECURITY MESH

If you are looking for total security, then upgrade to Steel Security Mesh reinforcing which is unique to Rockdoor. The Steel Mesh reinforcing is enclosed in-between the door surfaces to ensure your door will never be cut through by a burglar, which is becoming an increasingly common form of entry for doors. Whilst the door will look no different, you'll have the peace of mind knowing you're protected.

UNRIVALLED CONSTRUCTION

Strong Internal Structure

The inner frame of a Rockdoor is fully reinforced with a 360° Aluminium box section that makes the door super strong. Not only does it ensure the door is fully protected from temperature fluctuations, it allows us to fix all our locking mechanisms and hinges into Aluminium to strengthen the door's performance overall and make forced entry almost impossible for a burglar.

IMPOSSIBLE TO CUT THROUGH

Steel Security Mesh within a Rockdoor makes it impossible to cut through by a burglar. It is similar to the way concrete is reinforced for extra strength. Please ask your installer about this optional extra.

ROCKDOOR

SECURITY. IT'S IN OUR DNA

WHY ROCKDOOR IS DIFFERENT

HOOKS

Sintered steel hooks with a 25mm throw engage into the reinforced outer frame.

S-GLAZING

No cassettes giving greater resistance to glass removal, perfect colour match and no air or water leakage. All our glass is toughened as standard or laminated where required.

ENGINEERED INNER FRAME

A welded and reinforced door skeleton is impervious to moisture ensuring it won't swell or rot.

REINFORCED FRAME

Rockdoor's inner frame is reinforced with aluminium making it the strongest door frame on the market.

CYLINDER

3 star diamond sold secure cylinders prevent forced attack.

DEADBOLT

Secures the door sash to the outer frame acting as part of the multipoint lock.

MADE TO MEASURE

All our doors are made to measure and not cut to fit. Standard composite doors are cut to fit which weakens the door overall.

STEEL SECURITY MESH

Make your door 4 times stronger and impossible to cut through with steel security mesh.

OUTER FRAME

PVC-U multi-chambered, insulated outer frame for high levels of thermal performance and strength.

STEEL KEEPS

Steel hook locks engage into full length steel keeps preventing forced entry.

HINGES

Engineered 3 way adjustable hinges secured into the reinforced frame for extra strength.

HIGH IMPACT DOOR SKINS

Thick and tough 3mm PVC-U door skins both internally and externally resist cutting and impacts.

HIGH DENSITY CORE

60% stronger than standard composite doors.

DESIGNED TO BE SECURE

Rockdoor meets and exceeds all industry standards. In fact, we achieved Secured by Design accreditation back in 1999.

It's important to know what goes on under the surface of a Rockdoor, as this is what makes our door so strong and secure.

Secured by Design

Police Preferred Specification

Secured by Design

To ensure your door is Secured by Design or PAS24 accredited please ask your installer.

ROCKDOOR

BURGLAR PROOF LOCKS

MULTIPOINT HOOKS

Our steel hook locks slide into steel keeps that run the full length of the outer frame. It means your Rockdoor can't be forced open.

DEADBOLT

The door sash is secured using the steel hooks, and then held in place with a deadbolt that engages into the centre of the door frame for maximum strength.

GEARBOX

Although unseen, our multipoint lock gearboxes play an integral part in your door's security. They house our huge hook locks whilst ensuring smooth lock functionality.

In fact, it's so hard to break through a Rockdoor that the Fire Service visited our manufacturing facility for training on how to do so in the rare event of an emergency. To help them during their practice sessions, they used a high tech diamond-tipped power saw which even expert burglars don't carry with them.

For over 20 years we've been investing in the technology needed to build you the toughest, safest and most energy efficient doors available. Our locking systems and reinforced inner frames protect more than half a million UK homes.

Can you really afford to settle for anything less?

70% of burglaries involve forced entry through the front or back door. Back doors in particular are vulnerable as they are often out of sight, so a strong and secure Rockdoor front and back is important.

Secured by Design
To ensure your door is Secured by Design
or PAS24 accredited please ask your installer.

DIAMOND SECURE 3 STAR CYLINDERS

FORCED ATTACK

Prevention is the cure to stop forced entry into your home. The cylinders we use are designed to go into 'lock down mode' if the attempt of forced entry is detected keeping you and your property secure.

SNAPPING

An innovative sacrificial front section is designed to snap away if attacked by an intruder, which in turn shuts down the locking mechanism and prevents access to the inner workings of the lock keeping you safe.

DRILLING

You'll have probably never heard of it, but our cylinder features a solid cam which is made of a material called 'Molybdenum'. It's much stronger than steel to ensure your lock can withstand any burglar's attempts to drill through your lock.

It's reassuring to hear and read about 3 star cylinders, multipoint locks, 50mm thickness, reinforced frames, toughened glass, S-Glaze technology and high impact PVC-U skins.

But we know what matters most as you lock up your home is that the only way to get past your Rockdoor is with your key.

That's why Rockdoors come with a 3 star security rating - the best there is.

Our lock cylinders are burglar proof. A TS007 3 star rating (the highest available), SS 312 Sold Secure Diamond Standard and Secured by Design accreditation see to that.

ROCKDOOR

ROCKDOOR S-GLAZE

S-GLAZE. EXCLUSIVELY FROM ROCKDOOR

All Rockdoors feature our unique S-Glaze technology. It means the glass is locked into your door for life.

This prevents forced entry through the glass as there is no glazing cassette to attack, whilst also eliminating draughts through the glazing apertures which improves the door's thermal performance.

ZERO FADING

Glazing cassettes which are widely used on standard composite doors, are prone to fading and discolouration.

This is because they are constructed of a different material from the door, as well as featuring a different painted finish that fades. Therefore, if you choose another composite door, your door and glazing cassettes could well stand out from the crowd, but for completely the wrong reason!

LAMINATED GLASS

It's very rare for door glass to be smashed due to the noise it creates which would draw attention to the intruder. Whilst all our glass is toughened, we do offer customers who feel vulnerable the option to upgrade to laminated glass, often in accordance with Secured by Design. Laminated glass is two pieces of glass with a plastic inner film like a car windscreen.

THERMAL PERFORMANCE

Like your safety, your energy bills are in good hands. A combination of material choices such as PVC-U and a 50mm thick high density polyurethane core and unique manufacturing techniques such as S-Glaze Technology, allow Rockdoor to produce good thermal ratings.

CREATE AN ENTRANCE WITH 3D GLASS

GLASS

Unique and exclusive to Rockdoor, our popular 3D glass designs will create an instant talking point with everyone knocking at your door and give your home real kerb appeal.

CLEAR

(inward or outward) gaps

These designs feature opposite sandblasted effects on the front or rear piece of glass for the ultimate 3D effect.

Styles available with this effect are:

- Vogue Cube (inward effect)
- Vogue Optima (outward effect)
- Vogue Archer (inward effect)
- Vermont Continuity (inward effect)

OBSCURE

The beauty of 3D effect glass, but with a little more privacy. These designs feature a clever use of sandblasted and sandstone glass which work together perfectly to provide stunning effects combined with privacy.

Styles available with this effect are:

- Vogue Haze
- Vogue Shade
- Vermont Haze
- Vermont Shade

ROCKDOOR OBSCURE BACKING GLASS

Choosing an obscure backing glass in replacement of clear glass will reduce the Door Energy Rating - we recommend all designs featuring Gluechip glass are backed using clear glass to enable us to use a specially coated glass (these designs are indicated with an * between pages 84 – 87). Alternatively, if you would like a different backing glass, the options below are available.

STAINLESS STEEL FURNITURE OPTIONS

All furniture options on this page are made from marine grade stainless steel. Each door that features stainless steel furniture will come with a cleaning solution to help you maintain the appearance of this natural material.

SWITCH LATCH

Switch Latch allows you to set your lock so the latch can secure the door in place when opening and closing should you wish it to do so (in a similar way to how a split spindle or night latch operates), or alternatively you can set it so it can open and close freely like a roller latch.

Stainless steel bar handles are available in the Dakota, Indiana, Vermont and Vogue. Indiana and Vermont door styles have minimum width size restrictions.

Hook up with Rockdoor

Strong steel multipoint hook locks with a 25mm throw, securely attach the door to the frame.

Glass Leading Security

Rockdoors feature S Glaze technology, meaning your glass is locked into your door for life, for added security.

Stronger, It's Official

Studies show that a Rockdoor is 35% stronger than a typical GRP door.

Core Benefits

Rockdoor's inner strength is unsurpassed thanks to a combination of safety features.

3 Star Cylinders

Our lock cylinders are burglar proof with a TS007 3 star rating, SS 312 Sold Secure Diamond Standard.

Forced Entry

Designed to ensure homes and families are fully protected from forced entry.

DOORWORKS AND DOORSETS

FULLY CERTIFIED FIRE DOORSETS

Doorworks are fully certified for offering fire doorsets. We are one of the few Doorset suppliers in Scotland certified to produce these products. They are supplied fully assembled comprising the door, frame, hinges and seals. Ironmongery and architraves can be added as an extra option. We have a standard specification but these can be altered to suit customer requirements and certification depending on the project.

HINGES

All doorsets are generally factory hung, on Class 13 100mm Ball Bearing Butt hinges. Hinges are supplied as Chrome as Standard.

Polished Chrome, Satin Chrome and Brass are also available on request. We can also offer Self Closing spring hinges for FD30 or FD60 doors. If these are required, please request on enquiry.

FRAMES

Our Standard frames are made of a Rebated piece of timber. This can be either Redwood or Hardwood Unfinished, Primed or fully Lacquered. If a loose stop is required, we can also offer this on request.

INTUMESCENT

For doorsets to be compliant to certification, they must include the correct seals. Our Intumescent flipper seal fully complies with this. The 15x4mm Fire and Smoke Seal is routed out to the frame and fitted before delivery. Leaving you with peace of mind!

BESPOKE SERVICES

BOOKMATCHED PAIRS

If you have more than two doors that are used beside each other in the same area, why not get them book matched so they match each other. We can offer this service as a bespoke service with all our Real Wood Veneers.

IRONMONGERY CUT OUTS

Our State of the art CNC machine can cut out any type of Radius Edged Ironmongery required. From Locks to Drop Seals. Sample must be approved before production!

VISION PANELS

We are fully certified to produce vision panels in any door. Pick from our range of Standard designs on page 62 or design your own. From NFR to 60/60 glass, Timber Flush Beads or Stainless Steel Portholes, we can offer them all.

EASY TO FIT, COST EFFECTIVE AND THE PERFECT FINISH

Doorworks pride themselves in offering the complete package with the least hassle. Have your door, frame, ironmongery and architraves supplied complete as a set for easy installation.

Available in a range of finishes, fire ratings, acoustic ratings and style. All ironmongery can be supplied and fitted as part of the set, or cut out only options available.

SCREENS

AS WELL AS DOORSETS, WE ALSO OFFER TIMBER SCREENS.

As part of BWF, we are fully certified for manufacturing fire rated and acoustic rated high performance screens. All requirements can be covered for houses, schools, hotels, hospitals and all other public sectors. Choose from a range of hardwoods and finishes.

Come in and meet our dedicated sales team who can help and advise with any specification or technical questions.

COMMERCIAL PROJECTS

Many projects demand something more than a standard offering. Whether the project be a hotel, school, student accommodation or hospital we can offer an impressive solution to suit these requirements. Building Regulations and other statutory requirements for commercial environments can be challenging but here at Doorworks we have the solution whilst still retaining a high quality and traditional appearance.

HOUSE BUILDERS

Private and Social housing is a large part of Doorworks production. Small one off projects, exclusive developments or large sites, we can work with you to create the finished look you want. Contact us to let us help finish your home with the WOW factor!

WHY YOU SHOULD CHOOSE US

A purpose built warehouse to hold our £1.5 million stock, all sectioned and organised for easy and quick supply. Along with our 1,500 m2 built factory full of state of the art machinery and a driven workforce to produce high quality products.

Our production team can assist with help in scheduling and site call offs. From handing doorsets to technical queries, we are here to help every step of the way.
